Skills

Javascript (ES6) ★★★★☆

HTML/CSS/SCSS/Bootstrap ★★★★☆

React ★★★★☆

Redux ★★★☆☆

GitHub ★★★☆☆

From a young age, I was interested in web development. I have finished the "Javascript + React / Redux" course and now I'm actively expanding my knowledge and developing myself in this direction, learning new libriaries and technologies like TYPESCRIPT, SCSS, Tailwind, NEXT.JS, etc. You can find a few example projects using the above technologies on my GitHub. I am always open to learn something new. For more info please visit my personal web page: www.eduardtymoshuk.epizy.com

Work History

2022-07 - present

Web Developer

Crowbox, Remotely

Providing a front-end website development using WordPress, working with Woocommerce, Elementor and other software. Writing JS scripts and functionality for web pages.

Projects

My personal web page

www.eduardtymoshuk.epizy.com/

Stack: *React, Next, Styled Components*

My personal website where you can find some information about me, my CV

Tailwind	★★★☆☆
Vue.js	★★☆☆☆
Wordpress	★★☆☆☆
Node.JS/MongoDB/Express	★☆☆☆☆
Typescript	★☆☆☆☆

Languages

Ukrainian - C2

Polish - C2

Russian - C1

English - B1

or finished projects. At this project I used a React library and Next framework for building pages and a Styled Component for styling it, which help me to expand my knowledge in this fields.

Admin Dashboard App

www.eduardtymoshuk.epizy.com/projects/dashboard-syncfusion-app

Stack: *React, Context API, Tailwind, Syncfusion*

A modern and fully responsive admin dashboard page. At this project I used a React library for building pages, Context API for state management and a Tailwind for styling it, which help me to expand my knowledge in these fields. I learned how to add Tailwind to React project and how to config it. I also got to know with an UI components library Syncfusion and used it for building components.

Bonbonfrancais: web page for French teacher

www.eduardtymoshuk.epizy.com/projects/bonbonfrancais/

Stack: *HTML5, CSS3, JS, Bootstrap5*

A landing page for online French teacher. Website is built with HTML5/CSS3/JS(ES6) and Bootstrap library. Website uses a simple REST API made with MongoDB and Express (also write by myself) for login/logout and feedback leaving and getting functions. During this project I learned how to build a fully responsive, working personal web page, implement an additional functionality, communicate with REST API and deploy page to the hosting. I also expand my knowledge of Bootstrap library. Aditionaly I got a basic knowledge of Node.js, MongoDB and Express wrighting a REST API for this page.

Snake app

www.eduardtymoshuk.epizy.com/projects/snake

Stack: *HTML5, CSS3, JS*

My graduation project at Javascript course. It represents a simple game "Snake" and is made with HTML5, CSS3 and Vanila Js. During this project I got a deeper knowledge of JS, wich helps me in my future projects.
